Dear Garry

#### COUPLERTEC CORROSION PROTECTION

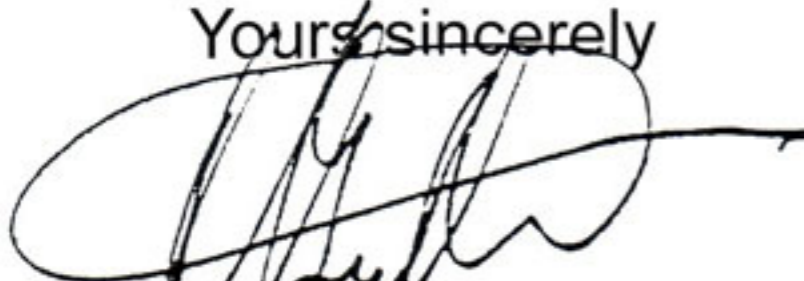

Thank you for the recent installation of the Couplertec anti-corrosion equipment on our three quad bikes, the Argo eight wheel amphibious vehicle and my own personal Land Rover.

The Couplertec unit fitted to our SES vehicle on Moreton Island is still going strong after three years. The vehicle exhibits no signs of rust or corrosion, despite being in continuous use on the island for that time. The success of that unit prompted us to invest in further units for our SES vehicles. I am certain that they will perform as well as the Moreton Island unit has.

I am so pleased with the performance of the Couplertec units with the SES unit, I have requested that my new Land Rover also have Couplertec unit installed to protect my investment and provide me with peace of mind for the life of the vehicle.

Please pass on my thanks and congratulations to all at Couplertec for their good service and great product.

Yours sincerely

John Butler  
Local Controller
